

GAS XLNC[™]SOFTWARE

Easy to Use Software Designed to Simplify and Standardize Gas Analysis

- Includes Extensive Range of Report Options and Calculations
- Users can add and customize Calculations to their Specific Needs
- High Level of Automation contributes to Optimized Analysis Accuracy and Precision
- () In Compliance with Various Refinery and Natural Gas Standard Test Methods

INSTRUMENT STATUS AND CONTROL

- Instrument status, creates sequences, and calculates end time for sequence
- Templates for samples/ calibrations, LIMS ID

CALIBRATION

- Setup multiple calibration sets
- Add sample uncertainties, track expiration dates

COMPONENTS FLEXIBILITY

• Add or edit physical properties for each component needed

ADVANCED OPTIONS

- Calculation for oxygen correction
- (ISO 6974-3)
- Bridge calculation across system channels
- Advanced Peak Identification for Individual peaks or peak Groups
- Unknowns handling
- Uncertainty Calculations
- Error propagation calculation (ISO 6974-2)

STANDARD TEST METHOD

- ISO 6974, ISO 6976, ISO 8973
- EN 15984 / DIN 5166
- EN 589
- ASTM D3588, ASTM D2598
- GPA 2172, GPA 2261, GPA 2286

ANALYSIS

Chromatogram View:

- Zoom/select
- Identify modes allow easy sample evaluation

REPORTING

- Print flexible reports
- Traceable, according to method or customized to need
- Export to file, LIMS

RELIABLE DATAMANAGEMENT

GASXLNC^m keeps track of all calibrations performed. This traceability allows for any result to be reproduced or recalculated with revised calibration data. Sample analysis results are maintained similarly.

Calibration can be performed in Single point, multilevel and bracketing mode, such as required in ISO6974-2. The calibration browser validates the calibration analysis and can be used to view analyzed calibration sets. The screen displays calibration plot and the calibration analyses results used, allowing calibration results to be approved or removed. Approved results are blocked from further change. The Trend Analysis function logs calibration/performance data over time, providing tools to the chemist for complying with any QC program.

ABOUT PAC

PAC develops advanced instrumentation for lab and process applications based on strong **Analytical Expertise** that ensures **Optimal Performance** for our clients. Our analyzers help our clients meet complex industry challenges by providing a low cost of ownership, safe operation, high performance with fast, accurate, and actionable results, high uptime through reliable instrumentation, and compliance with standard methods.

HEADQUARTERS

PAC LP | 8824 Fallbrook Drive | Houston, Texas 77064 | USA T: +1 800.444.8378 | F: +1 281.580.0719 Our solutions are from industry-leading brands: AC Analytical Controls, Advanced Sensors, Alcor, Antek, Herzog, ISL, Cambridge Viscosity, PSPI, and PetroSpec. We are committed to delivering superior and local customer service worldwide with 16 office locations and a network of over 50 distributors. PAC operates as a unit of Roper Technologies, Inc., a diversified technology company and a constituent of S&P 500, Fortune 1000, and Russell 1000 indices.
