

2019 PAC Refinery Gas Analyzer (Hi-Speed RGA) Training - Rotterdam
Dedicated Training to Improve Performance, Knowledge and Skills

PAC Training program Rotterdam

The AC Analytical Controls® product line offers a range of high-tech analyzers for petrochemical sample streams, based on Gas Chromatography. Our products are user friendly and easy-to-use, although the technique is complex. To improve your skills, obtain the best results, and completely understand your analyzer, PAC offers a complete program of factory, customized and on-site trainings. These courses are designed to assist operators and lab engineers in their day-to-day operation of PAC systems by providing the optimal mix between theory, practice, and hands-on training. Training improves laboratory productivity and the accuracy of instrument results.

HiSpeed RGA Course Description

The 2-days HiSpeed RGA training course is designed for new and existing customers of PAC products; however, a basic knowledge of gas chromatography is required. Class sizes are small so the course is highly interactive and flexible. The courses consist of theoretical and practical sessions, including:

- System details, software and hardware operation Application in a practical way
- Interpretation of results and discussion
- Troubleshooting and maintenance
- Calibration of the instrument

Detailed Program:

Day 1: Introduction Hardware & Software

- Introduction to gas applications
- RGA configuration & System description
- Hardware: Valves, Actuators, Columns, Detectors
- GASXLNC™ Software introduction, RGA database handling, special calculation
- System start-up and software installation and configuration

Day 2: System calibration, troubleshooting and maintenance

- Calibration of the system, generate report
- Calculations & interpretation of results
- Laboratory exercises for day-to-day operation
- Troubleshooting and maintenance
