

Distillation Analyser Workshop

(ASTM D86, ASTM D1160 and ASTM D7345)

Course Description

This hands-on and lecture course is intended to increase your understanding of PAC's Cold properties analysers and the related ASTM methods. You will receive presentations for theory and component identification, mixed with hands on training with instruments in our laboratory. Also covered will be the software for user interface, calibration, maintenance, and troubleshooting for common problems. Customized applications will be reasonably accommodated upon request. This course is conducted by certified, skilled PAC technicians who have experience with the instruments in real world applications. You will also have access to the PAC support group for specific discussions and forums for your unique situations.

Who should attend?

New users or current operators who want a refresher to fill in knowledge gaps.

Course materials

PAC will provide the presentations as well as the instruments.

Length

3 days

Language

German

English classes are available on request.

Course Part Number and Cost

Part Number: On request

1200 € for each attendee

Agenda

As shown below. Modifications can be made on participant's requests.
