

2026 PAC JFTOT IV Training - Houston

Dedicated Training to Improve Performance, Knowledge and Skills

PAC Training program Houston

The Alcor product line offers a range of high-tech analyzers for petrochemical sample streams. Our products are user-friendly and easy-to-use, although the technique is complex. These courses are designed to assist operators and lab engineers in their day-to-day operation of PAC systems by providing the optimal mix between theory, practice, and hands-on training. Training improves laboratory productivity and the accuracy of instrument results.

JFTOT IV Course Description

The 2-day JFTOT IV training course is designed for new and experienced users of PAC products.

Class sizes are small, so the course is highly interactive and flexible.

The courses consist of theoretical and practical sessions, including:

- System details, software and hardware application in a practical way
- Interpretation of results and discussion
- Troubleshooting and maintenance
- Calibration of the instrument

Detailed Program:

Day 1: Introduction & system familiarization

- JFTOT IV overview - System features.
- User interface orientation.
- ASTM methods & applications.
- Operations - Sample/testing preparation & execution

Day 2: Data Evaluation, Calibration, & Preventative Maintenance

- Calibration requirements and procedures.
- Routine maintenance.
- Hands on maintenance.
- Common error messages.
- Basic troubleshooting and repairs.
